

## Continuation of Mission and Vision

### Core Values:

Four fundamental values guide the AIEIP:

- **Equity:** Ensuring AI tools promote fair and just outcomes for all students, particularly those with disabilities and from marginalized backgrounds
- **Transparency:** Maintaining openness about how AI systems operate, make decisions, and use student data
- **Accountability:** Establishing clear responsibilities and oversight mechanisms for AI implementation
- **Innovation:** Embracing technological advancement while prioritizing student well-being and educational quality

AIEIP will integrate these ethical AI practices into SAU41's SPED services and lay the groundwork for an organizational structure that effectively supports this mission and vision.
